

Tropical

Die zarten, sternförmigen Blüten der Trachelospermum verströmen besonders intensive Düfte in den Gärten und verleihen, auch wegen ihrer außergewöhnlichen Blattform und Wuchsart, einen tropischen Touch. Ein Parfümeur analysierte die Düfte der gelben, weißen und rosafarbenen Blüten - sie sind allesamt unter dem Segment "Floral" eingeordnet, welches die frischen, blumigen Düfte zusammenfasst.

The tender, star-shaped blossoms of the Trachelospermum permeate gardens with their intense fragrances and, thanks to their leaf shape and growth type, add a tropical touch. A perfumer analysed the fragrances of the yellow, white and pink-coloured blossoms and classified them as belonging to the "floral" category that encompasses fresh, flowery fragrances.

Die duftenden, weißen Blüten des Philadelphus locken Insekten und besonders Bienen in den Garten. Ein Parfümeur analysierte die Philadelphus- Düfte und sortierte sie in drei Segmente: "Fruit & Citrus" steht für eher süße, fruchtige Düfte während "Chypre & Wood" für eine frische, pfeffrige bis holzige Note steht und "Floral" fasst alle frischen, blumigen Düfte.

The fragrant, white flowers of the Philadelphus not only attract insects, but also bees to your garden. A perfumer analysed the fragrances of the Philadelphus and sorted them into three categories: "Fruit & Citrus" refers to fragrances that tend to be sweet and fruity, "Chypre & Wood" to fresh, peppery to woody fragrances and "Floral" spans all fresh, flowery fragrances.
